

Ian Burke

Software Engineer · AI Integration

ianjamesburke@gmail.com ianjamesburke.github.io github.com/ianjamesburke

I build AI applications, data pipelines, and tools for working with coding agents. My work covers the interface, integrations, and backend. I came to software through video production.

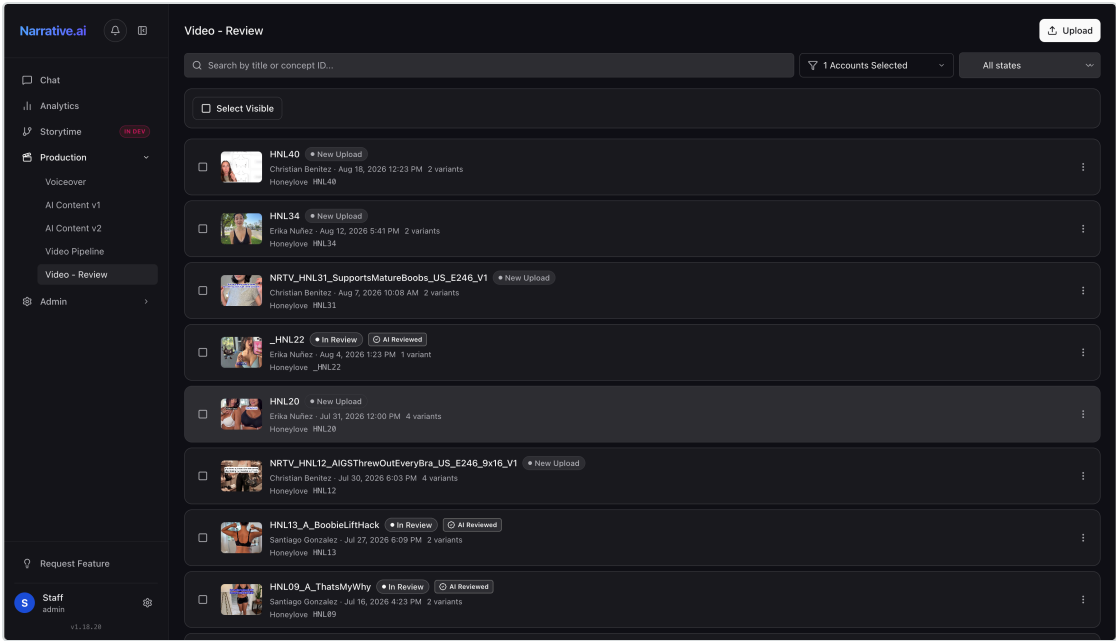

EXPERIENCE

Davenport University	Current
AI Integration Specialist	
Narrative Ads	2022 - Present
Freelance Software Engineer	
Narrative Ads	2018 - 2022
Video Producer & Editor	

CLIENT WORK

NarratorAI

Build and maintain AI media tools and ad analytics for Narrative Ads. Develop provider integrations, investigate generation failures, and report on infrastructure costs.

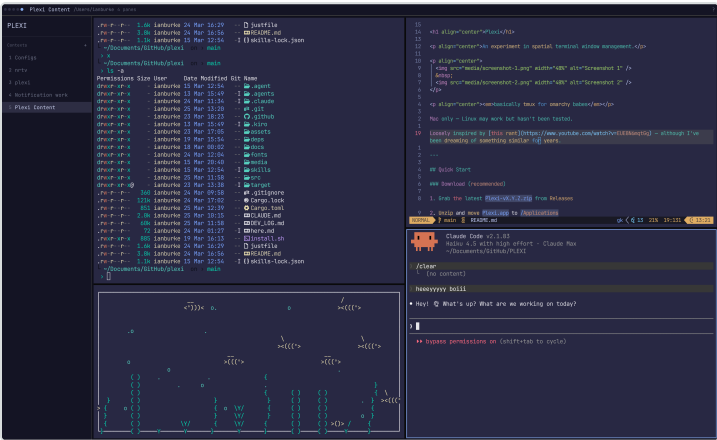

TECHNICAL SKILLS

Python, TypeScript, JavaScript, Rust · React / Next.js, SvelteKit, FastAPI · Firebase, Google Cloud, SQLite · AI integrations, structured extraction, agent workflows

PLEXI

A desktop workspace for coding agents

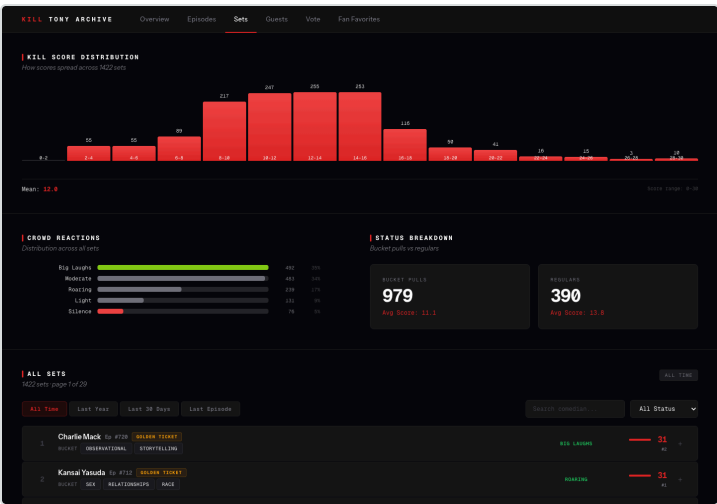

I wanted terminals, project context, and small tools in the same place while working with coding agents. PLEXI is the desktop application I built for that workflow.

A Rust host with pane and project-context controls, an agent-accessible CLI, and a WASM app runtime.

Rust · egui · Wasmtime
Open source / macOS pre-release

Kill Tony Archive

From long recordings to browsable data

A pipeline that turns long podcast recordings into transcripts and structured records, with a web interface for exploring the results.

Built an audio-to-data pipeline and web app. Separates transcription from analysis and cleans up duplicate records. The September 2026 local dataset holds 1,422 sets across 110 episodes.

Python · Gemini · SQLite · FastAPI · SvelteKit
Independent project / AI data pipeline and web application
