

NARRATORAI / NARRATIVE ADS

Software for making video.

01

I started in video production.
Now I build tools for the
people doing that work.

THE WORK

AI media workflows, voiceovers, and
ad analytics in one internal platform.
My work spans the interface,
provider integrations, and cloud
backend.

BEYOND THE INTERFACE

Investigating generation failures,
deploying capacity changes, and
reporting on provider costs.

PLEXI / DESKTOP WORKSPACE

My workspace for coding agents.

02

Terminals, project context, and small apps. In the same place.

WHY I BUILT IT

I wanted an environment I could change as my work with coding agents changed. PLEXI is now my daily workspace.

WHAT I BUILT

A Rust desktop host with panes, project contexts, an agent-accessible CLI, and a WASM app runtime.

plexiapp.com

MY ROLE

Creator & developer
Product, host architecture, CLI & SDK

BUILT WITH

Rust / egui / Wasmttime
macOS pre-release

KILL TONY ARCHIVE

Making long recordings browsable.

03

A pipeline that turns podcast audio into records people can explore.

WHAT I BUILT

Separate transcription and analysis stages, transcript deduplication, and speaker normalization. A web app adds rankings, voting, and shareable stat cards.

1,422

Set records across 110 episodes.
Local dataset, September 2026.

Audio → Transcript → Records
