

Ian Burke

Software Engineer · AI Integration & Automation

ianjamesburke@gmail.com ianjamesburke.github.io github.com/ianjamesburke

Build and maintain AI products, data pipelines, and tools for working with coding agents. Work across user interfaces, backend services, provider integrations, and production troubleshooting. Background in commercial video production.

EXPERIENCE

Davenport University

AI Integration Specialist

Current

Narrative Ads

Freelance Software Engineer

2022 - Present

- Build and maintain NarratorAI, an internal platform for AI media production and advertising analytics, using TypeScript, Next.js, and Firebase.
- Develop image, video, and voiceover workflows with Gemini, fal.ai, and ElevenLabs, alongside advertising-data integrations.
- Investigate generation failures, deploy backend capacity changes, and reconcile provider billing into monthly infrastructure reports.

Narrative Ads

Video Producer & Editor

2018 - 2022

Directed, produced, and edited paid social ads for brands including DoorDash, Harry's, and Native. Managed creative direction, revisions, and production handoffs.

SELECTED PROJECTS

Kill Tony Archive · AI data pipeline and web application

Built separate transcription and structured-extraction stages for long recordings, with transcript deduplication and speaker normalization. The September 2026 local dataset contains 1,422 set records across 110 episodes. Python, Gemini, SQLite, FastAPI, and SvelteKit.

PLEXI · Desktop workspace for coding agents

Built a Rust application combining terminal panes, project contexts, notes, and apps. Includes an agent-accessible CLI and a WASM app runtime. Used as my daily working environment; macOS pre-release.

TECHNICAL SKILLS

Python, TypeScript, JavaScript, Rust · React / Next.js, SvelteKit, FastAPI, Node.js · Firebase, Google Cloud, SQLite, GitHub Actions · AI provider integration, structured extraction, agent workflows, incident investigation
